Section 8:

para

Start up the Many Cam app that will communicate with Google Hangouts. Originally, the was required for compatibility with the Hangout, but it might be just an extra step,

at this point. Still, the extra camera control and effects might also be useful, some day.

Section 10:

para

Open a web browser (I use Chrome) to Google plus.

10 plus.google.com

The screenshot shows the Google+ interface. At the top, there's a navigation bar with a home icon, dropdown menus for 'Home', 'All', 'Friends', and 'Fans'. A banner says 'Meet the new Google+'. Below it, a large input field asks 'What's new with you?'. Underneath are six icons: Text (pencil), Photos (camera), Link (link), Video (play button), Event (calendar), and Pol... (partial view). A section titled 'Politik' contains a post by 'Bernd Paysan' (profile picture of a man). The post was shared publicly at 6:12 AM. The content of the post is: '+++ Miss Moneypenny ist dann mal verhaftet worden +++'. Below the post, a comment reads: 'Die anderen Agenten, die in Italien wegen einer CIA-Entführung Abwesenheit verurteilt wurden, sind noch auf freiem Fuß. Aber Sekretärin haben sie jetzt.' A note at the bottom says 'Try the new Google+!'. The taskbar at the bottom includes icons for File Explorer, Task View, Start, Edge, Internet Explorer, File, Mail, and others.

Section 11:

para

Switch over to the SVFIG account, rather than my personal one, so the announcement comes out from that organization.
